

The figure displays a 10x10 grid of 100 small plots, each representing a 100m² area. The plots are arranged in a 5x2 grid of 5x10 sub-grids. The color scale ranges from 0 (white) to 10 (dark blue). The distribution shows a clear trend of increasing species richness from the top-left to the bottom-right, with the highest values (dark blue) concentrated in the bottom-right corner.
